

RETROFIT SOLUTIONS

DRIVING SUSTAINABLE CHANGE IN
THE BUILT ENVIRONMENT

ACHIEVE YOUR SUSTAINABILITY GOALS WITH PBC

INTRO

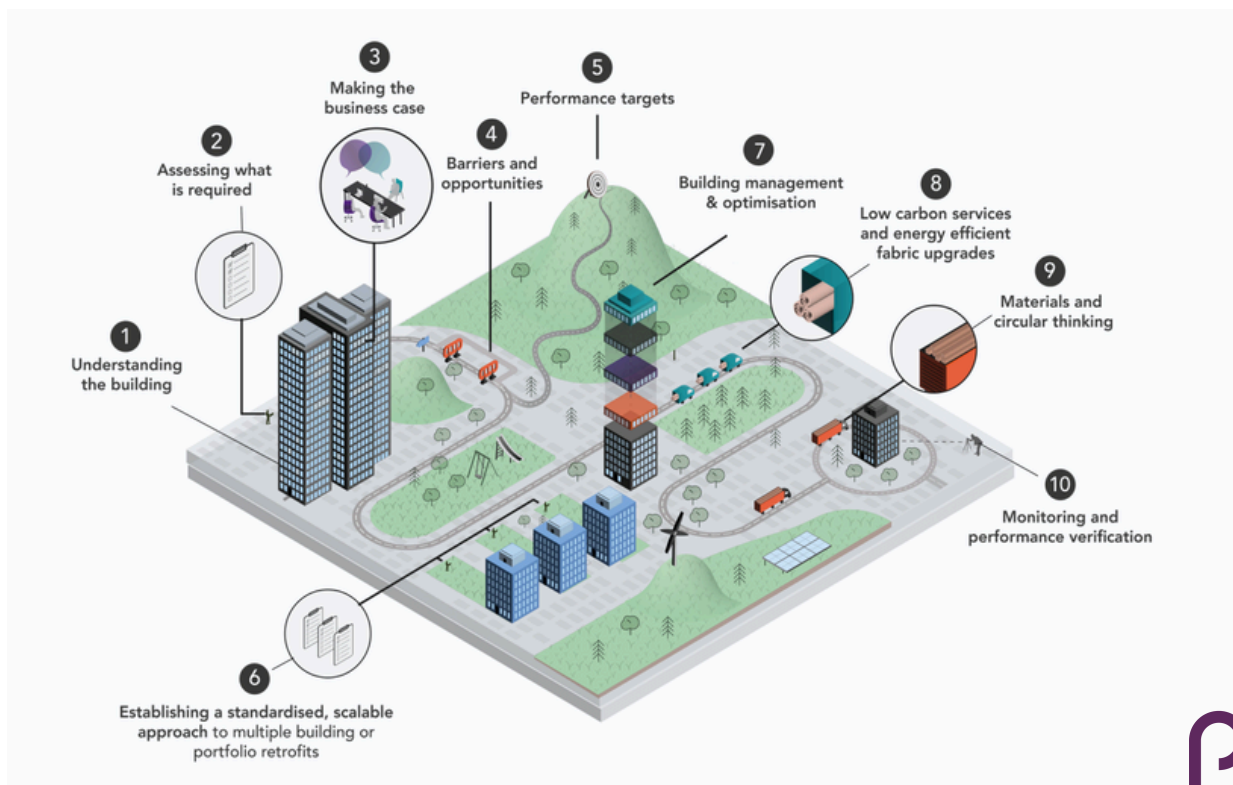

Retrofitting our existing commercial buildings is critical to meeting The UK's 2025 Net Zero Carbon Target.

23% of the built environment carbon emissions come from existing commercial building stock.

Creating a more sustainable built environment in the UK requires a comprehensive set of strategies designed to reduce carbon emissions.

These can be assisted by:

- **REMOVAL OF FOSSIL FUELS**
- **MAXIMISING ENERGY EFFICIENCY**
- **PASSIVE & ACTIVE DESIGN TECHNIQUES + MATERIALS**
- **INTEGRATION OF SMART TECHNOLOGIES**
- **USE OF LOW-CARBON MATERIALS + DECARBONISATION**
- **EMBRACING RENEWABLE ENERGY OPTIONS**
- **USE OF ENERGY EFFICIENT LIGHTING**
- **HEATING + COOLING SYSTEMS**

CASE STUDIES

As a business, we are committed to minimising our impact on the environment and, as a consultancy, supporting our clients to do the same, creating a sustainable future for everyone.

The Artesian

Sector: Commercial
Client: CLS Holdings

- 91,000 sq ft
- EPC A
- BREEAM Excellent

Moretown

Sector: Commercial
Client: Resolution

- 240,000 sq ft
- EPC C
- BREEAM Excellent
- NABERS 4.5
- WELL Platinum

Rose Court

Sector: Commercial
Client: WPP

- 240,000 sq ft
- EPC B
- BREEAM Excellent

25 Marylebone

Sector: Commercial
Client: Princeton Investments

- 60,000 sq ft
- EPC B
- BREEAM Excellent

Client Review - Munich RE, Magdalena Sobczak

Thank you for your excellent work. We were not at this point of the project without PBC's support, and I'm fully aware that we made PBC work to aggressive timelines.

Thank you, PBC, for making it happen.
